Head Coach: Nell Fortner Record at GT: 16-9 (1st season) Career Record: 178-126 (10th) GT vs. NC State: 23-47 Last meeting vs. NC State: 1/27/19 - NC State 68, GT 60

Head Coach: Wes Moore Career Record: 720-229 School Record: 162-60 (7th) NC State vs. GT: 47-23 Last game: 2/13/20 Louisville 66, NS State 59

#### **STARTING FIVE**

1. Georgia Tech continues this two-game road swing visiting No. 4 NC State on Sunday. The Yellow Jackets and Wolfpack will tipoff at 2 p.m. on ACC Network Extra for the 71st meeting in program history.

2. Georgia Tech and NC State have met on the hardwood 70 times dating back to 1980 with the Wolfpack leading the series, 47-23. NCSU has taken the past six meetings against GT with the Jackets last winning on Feb. 17, 2013.

3. The Yellow Jackets dropped their third overtime decision last Thursday, falling at Virginia Tech, 64-61. Francesca Pan led all scorers with 19 points, while Kierra Fletcher recorded he fourth career double-double with 17 points and 13 rebounds.

4. Georgia Tech will play two of its final four regular season games on the road and meet three teams with a RPI in the top 25. As of Feb. 15, NC State is 17, Louisville (4) and Florida State (24)

5. Four Yellow Jackets are averaging double-figure scoring numbers on the season, led by Francesca Pan with a 12.2 points per game average. Jasmine Carson follows with 11.4 ppg, Kierra Fletcher recorded a while Lorela Cubaj adds 10.4 ppg and Kierra Fletcher chips in 10.2 ppg.

double-double at Virginia Tech.

#### **SERIES HISTORY**

Georgia Tech and NC State first met on the hardwood in Raleigh in 1980 and have met 70 times since. The Wolfpack lead the series, 47-23, including a 22-8 advantage when competing in Raleigh. Tech was last victorious over NCSU on Feb. 17, 2013, which occurred in Raleigh. NCSU has taken six-straight over the Jackets including last year's decision in Atlanta, 68-60. Three Yellow Jackets finished ind double-figures last season, but the Wolfpack hit nine three-pointers and went 17-for-23 from the free throw line to take the win. NCSU won the battle on the glass, 38-31, but Tech forced 18 turnovers, recording seven steals.

#### LAST TIME OUT

Georgia Tech led by three points with less than 20 seconds to play in regulation, but Virginia Tech its eighth three-pointer of the contest with 13.3 ticks on the clock to knot the game and force overtime. The Hokies opened the extra period with a 7-0 spurt, but Francesca Pan answered with six unanswered points to pull the Jackets within one with just over a minute to play. The Jackets couldn't get another one to fall as VT secured the three-point overtime victory. Pan led all scorers with 19 points, followed by Kierra Fletcher who dropped 17 points and 13 rebounds. VT hit nine three-pointers in the win and forced 20 GT turnovers. GT held a six-point lead at halftime before VT opened the third guarter with an 11-4 run to regain the lead. VT outscored GT in the third, 27-18, and led for 14:24 of the game.

#### LENDING A HELPING HAND

Georgia Tech ranks 10th in the ACC in assists, having compiled 323 on the season for a 13.0 average per game. Louisville leads the league, averaging 15.8 apg. The Jackets have dished out 15-plus assists in seven contests and have gone 7-0 in those contests. Kierra Fletcher leads the Jackets in assists with 77 on the season, averaging 3.1 per game.

In ACC play. Francesca Pan leads the Jackets with 39 assists for a 2.8 assists per game average. The senior has recorded five assists in four ACC games and five games overall this season. She has eight ACC games of three or more assists -- 13 games overall this season.

#### **OVERTIME!**

Georgia Tech has played three overtime games this season, going 0-3 in the extra period. The Jackets have played overtime against North Carolina, at Miami and at Virginia Tech.

In 2016-17, Tech took then-No. 17 NC State to overtime in McCamish Pavilion, falling 75-67.

The last time Tech won an overtime game dates back to Jan. 31, 2013, edging Wake Forest at home by seven, 89-82.

#### **CUBAJ POSTS CAREER-HIGH**

Junior Lorela Cubaj came out of the Wake Forest win with a career-high in scoring, dropping 21 points, going 8-for-16 from the field and 5-for-8 from the free throw line. Cubaj nearly missed a double-double with a team-high eight rebounds. Inside the paint against the Deacs, Cubaj was 8-for-11 for 16 points.

In ACC play, Cubai is third on the team in scoring, averaging 10.6 points, and leads the Jackets with 7.6 rebounds per dame.

#### HERMOSA DROPS SEASON-BEST

In Tech's game at Pittsburgh, freshman Nerea Hermosa dropped a season-best performance with 16 points to go along with seven rebounds. She finished 8-of-10 from the field with two blocks and two steals.

Additionally, Jasmine Carson nearly missed her first double-double at Pitt, posting 17 points and nine rebounds. Carson hit 50.0 percent from three-point range, going 5-for-10 and recording two assists and a steal. Carson led the Jackets in both scoring and rebounds against the Panthers.

## FLETCHER IN THE CLUTCH

Junior Kierra Fletcher has hit two prominent buckets in the clutch this season. Her first moment occurred in the Coqui Classic in Puerto Rico during Tech's second game against Rice. Tied at 52-52 with nine seconds left to play, Fletcher hit a jumper just outside the paint with 1.9 ticks left on the clock. handing Tech the game-winning shot for a 54-52 victory.

Fletcher proved to be clutch once again in Tech's game against North Carolina. With the Jackets trailing by three, 54-51, Lotta-Maj Lahtinen found an open Fletcher in the far corner across from Tech's bench as the junior drained her second career three-pointer to tie the game at 54-54 with 11.2 seconds left in regulation. Tech would fall to UNC in overtime.

## **BREAKING IN TO THE TOP 10**

As senior Francesca Pan continues to climb the all-time three-point career leaderboard, she also broke into the top-10 all-time in career scoring with her 17 point performance against Clemson on Jan. 12. Now with 1,529 career points, Pan is Georgia Tech women's basketball's 10th leading scorer in program history. She broke into the top 10, surpassing Janie Mitchell and Kate Brandt who were tied for 10th with 1,422 career points. She needs 28 points to tie for ninth with Joyce Pierce at 1,557 points.

## FALLING LIKE SNOW

Tech's win at Syracuse on Jan. 16 marked the first-ever win for the Yellow Jackets at Syracuse. All five Tech starters finished in double-figure scoring numbers led by Jasmine Carson with 18 points. It marked the first time since Nov. 11, 2018 at Houston (double-overtime) all five Tech starters scored in double-figures. The last time Tech had all five starters in double-figures in a regulation game dates back to a 77-73 win over Miami on Feb. 21, 2010.

Tech has had five players score in double-figures two times this season: Grambling State and at Syracuse.

## **EARNING A STARTING ROLE**

Jasmine Carson earned her first start of the season at Florida State and has started six games for the Jackets. As a starter in those six games, Carson led Tech offensively with 15.3 ppg, hit 13 three-pointers (28.3 percent overall) and went 19-for-23 at the free throw line.

## **TOPPING THE TOP-25**

Georgia Tech has defeated two opponents ranked in the top-25 this season - No. 23/RV Miami (1/2) and No. 11/11 Florida State (1/9). Tech's win at Florida State marked the first road win over a top-25 team since Feb. 12, 2012 when GT defeated No. 23/RV North Carolina, 64-56. It marked the highest road win over a top-25 team since Tech topped No. 14/t11 NC State on Feb. 24, 2000.

The last time Tech defeated two top-25 opponents within a week of each other occurred in 1992 when Tech topped No. 4/5 Maryland on March 7 and No. 20/20 Clemson on March 8. In 2011, Tech defeated two top-25 opponents eight days

## LAST WIN VS. RANKED OPPONENT

Tech picked up its second win over a ranked opponent in the 2019-20 season, downing No. 11/11 Florida State on the road. The Jackets opened with a 10-4 lead and never looked back.

#### ACC PREDICTIONS

In the ACC Preseason polls, Georgia Tech was picked to finish 11th by the league's head coaches and 12th by the Blue Ribbon Panel. Louisville was the preseason favorite in both polls.

apart - Feb. 24 at No. 13/16 UNC and March 4 vs. No. 13/15 Maryland.

The last time Tech defeated two consecutive meetings of top-25 opponents was in 2001 when GT edged No. 21/11 Georgia (12/5) and No. 8/8 UNC (1/6).

#### **TURNOVER MARGIN**

Georgia Tech leads the ACC in turnover margin (+3.56) and ranks 50th in the nation in the same category. Only five times this season have the Jackets recorded more turnovers than their opponent - against ETSU (11 GT/8 ETSU), Texas A&M (14 GT/8 A&M), at Duke (24 GT/22 Duke), at Miami (GT 23/ MIA 19) and at Virginia Tech (GT 20/17 VT). Tech has forced 16 or more turnovers by an opponent in 19 games this season and seven games of 20 or more by an opponent.

#### **POINTING TO FLETCHER**

In the last 16 games, Kierra Fletcher has scored in double-figures 11 times and pulled down double-figure rebounds three times. She has averaged 11.0 points (second on the team) and 6.9 rebounds since Puerto Rico. The junior has also recorded 38 assists and shot 40.4 percent from the field, and 76.3 percent (45-59) from the free throw line.

#### **ON THE GLASS**

In Tech's games, the Yellow Jackets have averaged 38.6 rebounds per game, paced by Lorela Cubaj's 8.1 rpg average. Kierra Fletcher follows Cubaj with 6.6 rpg. Tech ranks 12th in the ACC in rebounding offense, first in defense, allowing 32.28 rpg by its opponents, fifth in rebounding margin (+6.32), and eighth in offensive rpg (13.40).

The Jackets have won the rebounding battle in all but eight contests this season. Virginia marked the first game this season the Jackets captured the victory despite dropping the rebounding battle. The Jackets also picked up the win at Florida State despite dropping the rebounding edge. Tech's other games dropping the battle on the glass include Rutgers and Texas A&M (both decisions played on neutral ground), and at Wake Forest.

Tech's game at Miami (1/30) marked the first of three games this season the Yellow Jackets won the rebounding battle, but fell in the contest. The others were against Notre Dame and at Virginia Tech.

Tech has recorded eight games with a rebounding margin advantage in double-figures, including its largest rebounding advantage of 30 against ETSU.

## FLETCHER IN THE CARIBBEAN

In Puerto Rico, Kierra Fletcher nearly averaged a double-double, finishing with 13.0 points (26 pts) and 9.5 (19 rebs) rebounds per game - leading the team in rebounding and second in scoring. She dished out five assists and shot 52.4 percent from the floor and 80.0 percent from the free throw line. Fletcher capped the Cogui Classic hitting the game-winning shot against Rice with 1.9 seconds left on the clock. In the Junkanoo Jam, Fletcher averaged 7.5 points and 6.5 rebounds.

Combined with her performance in the Junkanoo Jam in the Bahamas, Fletcher averaged 10.3 points and 8.0 rebounds per game in the Caribbean. She tied for team-lead in rebounding and second in scoring, shooting 51.6 percent from the field and 60.0 percent from the free throw line, and dished out 12 assists in the two tournaments.

#### CARSON DOMINATING OFFENSIVELY

Sophomore Jasmine Carson has opened her sophomore campaign in style, having recorded 15 games in double-figures, and topping her career-high in scoring three times on

the season. Carson ignited the Tech offense against Georgia State, dropping 21 points in the victory, connecting on eight field goals and going 4-for-5 from three-point range. It marked her first 20-plus point outing of her career.

She topped her career-high in scoring again, dropping 26 points against ETSU, going 10-for-15 from the field including a 6-for-8 performance from three-point distance.

## **CONQUERING THE STATE**

Georgia Tech completed the sweep of state of Georgia opponents with a road win at Kennesaw State. The Yellow Jackets have also picked up victories at Georgia and over Georgia State, marking the fifth time Tech has swept in-state opponents (GSU, KSU, UGA) - 2008, 2010, 2016, 2018 and 2019

#### **DOUBLE-TROUBLE**

Junior Lorela Cubaj picked up her fourth double-double of the season against No. 23 Miami on Jan. 2, dropping 10 points and 10 rebounds. She also recorded a double-double against

## **ACC WEEKLY HONORS**

2019-20 ACC Player and Freshman of the Week

Week 1 -Nov. 11 Player: Jocelyn Willoughby, Virgina Freshman: Elizabeth Kitley, Virginia Tech

Week 2- Nov. 18 Player: Nausia Woolfolk, Florida State Co-Freshman: Malu Tshitenge, North Carolina

Week 3- Nov. 26 Player: Haley Gorecki, Duke & Beatrice Mompremier, Miami Freshman: Kylie Kornegay-Lucas, Virginia

Week 4 - Dec. 2 Player: Dana Evans, Louisville Freshman: Anaya Peoples, Notre Dame

Week 5- Dec. 9 Player: Kiah Gillespie, Florida State Freshman: Amber Brown, Pitt

Week 6- Dec. 16 Player: Elissa Cunane, NC State Freshman: Sam Brunelle, Notre Dame

Week 7- Dec. 23 Player: Kiah Gillespie, Florida State & Beatrice Mompremier, Miami Freshman: River Baldwin, Florida State

Week 8 - Dec. 30 Player: Kendall Spray, Clemson Freshman: River Baldwin, Florida State

Week 9 - Jan. 6 Player: Elissa Cunane, NC State Freshman: Amber Brown, Pitt

Week 10 - Jan. 13 Player: Jocelyn Willoughby, Virginia Freshman: Shemera Williams, Virginia

Week 11 - Jan. 20 Player: Dana Evans, Louisville Freshman: Amari Robinson. Clemson

Week 12- Jan. 27 Player: Leaonna Odom, Duke Freshman: Shemera Williams, Virginia

Week 13 - Feb. 3 Co-Players: Emma Guy, BC and Janelle Bailey, UNC Freshman: Dayshanette Harris, Pitt

Week 14 - Feb. 10 Player: Kiah Gillespie, Florida State Freshman: Katlyn Gilbert, Notre Dame

Week 15 - Feb. 17 Player: Freshman:

**Week 15 - Feb. 24** Player: Freshman:

**Week 15 - March 2** Player: Freshman:

ETSU with a career-high 20 points and 11 rebounds. Her other double-doubles were against Georgia State and Seton Hall. She boasts eight double-doubles in her career.

Cubaj has led the Jackets on the glass in 15 games this season and posted nine games in double-figure scoring numbers.

## LAHTINEN SHINES

Sophomore Lotta-Maj Lahtinen has been strong this season, breaking her career-high in scoring twice. Lahtinen set a personal-best, scoring 18 points at Kennesaw State to help the Yellow Jackets pick up the road win. She hit a career-high four three-pointers, while tying her career-best seven field goals and pulling down nine rebounds to set a personal-high. She is fifth on the team in scoring, averaging 9.1 ppg. She nearly missed tying her career-high in scoring, dropping 17 points in the first half at Syracuse.

#### JUNKANOO JAM ALL-TOURNAMENT TEAM

Junior forward Lorela Cubaj was named to the Junkanoo Jam All-Tournament team after posting a successful tournament. Cubaj finished the tournament with 24 rebounds, 22 points, nine assists, four steals and two blocks. She led the team in rebounding, averaging 12.0 rebounds per game and finished third in scoring. Against Seton Hall, Cubaj nearly missed a triple-double with 16 points, 12 rebounds and seven assists (second double-double of the season). She recorded her third-straight game with double-figure rebounds in the championship against Rutgers, pulling down 12 rebounds. Cubaj is averaging 10.4 pts and 8.1 rbs on the season. She is eighth in the ACC in rebounding - Elissa Cunane from NC State leads the league, averaging 10.4 rpg.

## **TECH FOR THREE!**

Twice this season, Georgia Tech has connected on 12 three-pointers. The first was Tech's win at Georgia (11/17) when five different Yellow Jackets recorded a three-pointer. The Yellow Jackets also recorded 12 treys against ETSU (12/15), also with five Jackets hitting a triple.

The 12 three-pointers marked the sixth and seventh times in program history Tech has hit 12 or more treys in a game. The all-time record is 14 three-pointers (vs. App State, 12/11/16), followed by 13 three-pointers twice and three times sinking 12.

## **VICTORY TO REMEMBER**

Tech's first true road game of the season proved to be one for the record books as the Yellow Jackets recorded their first-ever win at Georgia on Nov. 17. The Jackets were 0-17 when competing in Athens entering the contest, snapping the streak. With the win, Tech has now won three of the past four meetings between the in-state rivals. The Jackets were held without a field goal in the opening eight minutes of the game and fell into a 13-1 deficit, but Tech remained confident and outscored the Lady Bulldogs, 72-27 over the remainder of the game.

## MAKING HISTORY

In Tech's game against Grambling State, the Yellow Jackets recorded just five turnovers in the outing, which marked a program record for lowest turnovers in a game. The previous record was six turnovers, recorded three times, most recently against Davidson on Dec. 2, 2003.

## **SCORING DEFENSE**

In Tech's first two games (Houston and Grambling State), the Jackets held their opponents to a combined four points in the second quarter (one field goal, two free throws).

In its season-opener, Georgia Tech held Houston to just one point in the second quarter, a free throw early in the frame. The Cougars shot 31.3 percent from the field for the game. Grambling State scored three points in the second quarter, hitting a free throw and field goal. The Tigers shot 33.3 percent for the game.

On the season, Tech ranks first in scoring defense in the ACC, allowing 51.4 points per game. It ranks 12th in scoring offense, averaging 62.7 points per game.

#### **NEW ERA**

Georgia Tech begins a new era of women's basketball under head coach Nell Fortner who was hired as the sixth head coach in program history on April 9. One of the most successful coaches in women's basketball history, Fortner has led programs at all levels including collegiate, professional and international stages. Fortner has led teams to Big Ten and Southeastern Conference championships and won three gold medals on the international stage, including the gold medal at the 2000 Summer Olympics in Sydney, Australia.

At the collegiate level, Fortner enters her 10th season as a head coach having led the helm at Purdue (one season) and Auburn (eight seasons).

#### **APPROACHING A MILESTONE**

The team's leading returning scorer from last season, senior Francesca Pan became the 31st player in Georgia Tech women's basketball program history to score 1,000-career points last season. Returning to The Flats for her final campaign this season, Pan is approaching another milestone as the Italian native needs to make 39 three-pointers to tie the all-time career three-point leader. Chioma Nnamaka owns the program record having recorded 269 three-pointers from 2005-08. Pan currently sits fourth all-time with 230 career three-pointers. She needs seven more three-pointers to tie for third with Alex Montgomery at 237 three-pointers made.

#### **BE ON THE LOOKOUT**

Senior Francesca Pan was one of 20 candidates tabbed to the 2020 Cheryl Miller Award watch list by the Naismith Memorial Basketball Hall of Fame and the WBCA. The award recognizes the top small forwards in women's NCAA Division I college basketball. It marks the second year Pan was named to the Watch List as the Jacket was placed on it as a junior.

#### WHAT RETURNS

Georgia Tech returns nine letterwinners from last season's squad and welcomes three newcomers. The Jackets return 59 percent of its scoring from last season and 59 percent of its rebounding.

#### WHAT'S NEW?

Even though Tech returns the core of its roster from last season, the Jackets welcomed three newcomers to the squad. Sarah Bates - A 5-9 redshirt-sophomore guard from Fresno, Calif., Bates redshirted last season at Kansas State and will have three years of eligibility remaining on The Flats. She was granted immediate eligibility from NCAA for this season. Due to NCAA transfer rules, Bates sat out last season at Kansas State after transferring from UC Santa Barbara where she played her freshman season (2017-18). During her inaugural collegiate season, Bates played in 29 games with 25 starts for the Gauchos and averaged 10.9 points per game, ranking 14th in the Big West Conference in scoring. Against Big West opponents, Bates averaged 13.1 points per game to rank 13th in the league in scoring. She shot 41.2 percent from three-point range, going 61-for-148 to lead UC Santa Barbara and rank fourth in the Big West in three-point field goals made. She finished the season with 82 assists, 69 rebounds, 17 steals and 16 double-figure scoring games, including four games with 20 or more points. She opened her collegiate career scoring 25 points at Northern Arizona and matched her season-high again at UC Davis later in the season.

**Nerea Hermosa** - Member of Spain's National Team... First participated with the National Team with the U14 team, playing in the BAM International Tournament in Slovenia... Earned MVP in round seven for her 27-point, seven-rebound performance against Barça-CBS... Competed in U16 European Championship when Spain finished fifth...Averaged 4.8 points and 3.0 rebounds per game during the tournament...Played with U17 Spanish National Team in World Cup in Belarus...Averaged 10.1 points, 8.7 rebounds and 1.0 blocks per game as Spain finished fifth...Ranked No. 5 international recruit by Prospects Nation, No.6 by Go Global and No. 15 international ranking by Collegiate Girls

#### **COMPETITION AWAITS**

The Yellow Jackets have a competitive 2019-20 schedule ahead of them as they have the potential to face 15 teams that reached postseason play last season, nine from the ACC. Eleven teams reached the NCAA Tournament last season including Rutgers (Junkanoo Jam), Texas A&M and Rice in non-conference action, and Miami, Florida State, Clemson, Syracuse, North Carolina, Notre Dame, NC State and Louisville in league play. Three teams competed in the WNIT: Houston, Seton Hall and Virginia Tech.

#### HOME SWEET HOME

All time, the Yellow Jackets are 376-214 (.620) when playing at home. The Jackets have won the last six-consecutive home openers dating back to the 2012-13 season.

#### **ALL OVER THE WORLD**

Georgia Tech's roster boasts players from seven different states and four different countries. Senior Francesca Pan (Bassano del Grappa, Italy), juniors Anne Francoise Diouf (Dakar, Senegal), Lorela Cubaj (Terni, Italy), sophomore Lotta-Maj Lahtinen (Helsinki, Finland) and freshman Nerea Hermosa (Vitoria, Spain) are Georgia Tech's five international student-athletes.

This past summer, Tech had three student-athletes representing their home countries on their National Teams. Junior Lorela Cubaj competed for the Italian National Senior Team for the first time, while Lotta-Maj Lathtinen and Nerea Hermosa each represented their home countries national teams.

#### HOW DO YOU SAY ....

Between Tech's five international players, several different languages are spoken. Check out who can speak what languages below:

Francesca Pan (Bassano del Grappa, Italy) - Italian, Spanish, English

Lorela Cubaj (Terni, Italy) - Italian, English, Spanish, Albanian Lotta-Maj Lahtinen (Helsinki, Finland) - Finnish, English, Swedish, Russian

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 5-20 110                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | unds                                                                                                                                                                                                                                                                                                                                                                                                               | 3   

                                                                                                                                                                                                                                                                                                                                                                                                         | -                                                                                                                                                                                                  | 3                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | -   

   

  

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 32                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |    #### 1st Season • Texas '82

Nell Fortner was named the sixth head coach of Georgia Tech women's basketball on April 9, 2019. One of the most successful coaches in women's basketball history, Fortner has compiled a 321-196 (.620) record as a head coach at the collegiate, professional and international levels. She has led teams to Big Ten (Purdue – 1997) and Southeastern Conference (Auburn – 2009) championships and, perhaps most notably, coached the United States national team to three international titles from 1997-2000, including the gold medal at the 2000 Summer Olympics in Sydney, Australia. Fortner is the winningest coach in the history of the USA women's basketball national team, having compiled a 101-14 (.878) record. In addition to the 2000 Olympics championship, she also led the team to the gold medal at the 1998 World Championship in Berlin, Germany and the 1998 William Jones Cup in Taipei, Taiwan. At the collegiate level, Fortner has nine seasons of experience as a head coach – one at Purdue (1996-97) and eight at Auburn (2004-12) – and has compiled a 178-126 (.581) overall record in the college ranks.
