Georgia Tech Sports Medicine Injury, Illness and Medical Procedures

Intercollegiate Athletic Medical Eligibility

- All physical examinations are scheduled through the athletic training staff after preliminary academic eligibility has been confirmed through the athletic administration.
- All prospective student-athletes must complete and pass a physical examination administered by a Georgia Tech team physician or designee before he/she is permitted to participate in athletic activity for Georgia Tech. The physical examination is effective for one academic year. A prospective student-athlete may lose his/her clearance status if the following are not completed:
 - o Athletes are allowed two weeks from the date of their physical examination to provide any additional medical information requested by the team physician.
 - o Any student-athlete under the age of 18 must provide a release form signed by his/her parent/guardian within two weeks from the physical examination in order for the Georgia Tech Sports Medicine Department to render medical care and services to the athlete.
 - o All prospective student-athletes must provide the Georgia Tech Athletic Association with requested insurance information. All walk-on prospective student-athletes are **required** to have health insurance **before** receiving a physical examination.
 - o Student-athletes and/or parents/guardians must sign all consent and acknowledgement forms, waivers and releases of information for Georgia Tech Athletics Association.
- A complete medical history <u>must</u> be provided to the athletic trainer or team physician before the physical examination. Failure to report conditions may result in disqualification from intercollegiate activity or delayed clearance to participate in intercollegiate activity.
- The team physician may re-examine any student-athlete and change the student-athlete's status at any time should the situation warrant.
- A complete medical history must be provided to the athletic trainer or team physician before the physical examination. The following conditions must be reported:
 - Injuries to the head, neck, back, upper and lower extremity, and internal organs
 - o Fractures, dislocations, strains, sprains and muscle tendon tears
 - Any serious illnesses, previous surgeries or pregnancy
 - Allergies, asthmas, diabetes, or epilepsy

- Previous counseling of alcohol/substance abuse
- c Cardiopulmonary problems
- o Family history of sudden death
- o Mental/nervous disorders including eating disorders
- o Any condition or illness that limited your ability to participate
- Prospective student-athletes with special conditions may be referred to specialists for examination. Failure to report special conditions will release Georgia Tech from any liability in the event of another injury caused by or related to the unreported condition. Any tests (x-rays included) or referral to specialists to conclude a student-athlete's physical examination may be the financial responsibility of the student-athlete and his/her family.
- Loss of one of the paired organs (e.g. kidney, eye) or any other condition that is determined by the team physician to be detrimental to the student-athlete's health and well-being may disqualify a candidate from participation in intercollegiate athletics.

Medical Treatment

- An athletic trainer will receive, examine and evaluate signs and symptoms presented in order to provide the needed healthcare or, refer to a physician as necessary.
- The Georgia Tech Stamps Health Services has the responsibility for health and welfare of the general student population. The Sports Medicine Department works in conjunction with the Georgia Tech Stamps Health Services to assist with the needs of the student-athletes.
- In case of an emergency or medical problem occurring outside of the normal athletic training room hours, contact an athletic trainer for assistance or advice immediately. Contacting your coach for help in reaching an athletic trainer or obtaining proper assistance may be advisable. If there is a true emergency or lifethreatening situation, dial 911. These problems should be immediately referred to the local hospital.
- All treatments and appointments will be conducted by an athletic trainer, under the supervision of a team physician.
- All treatments and doctor's appointments will be handled under the direction of the Sports Medicine Department. Only the team physician, the supervising athletic trainer or director of sports medicine may refer an athlete for outside treatment.
- It is the policy of Georgia Tech Sports Medicine that outside medical treatment for non-athletically related injuries or illnesses will not be covered.
- The Sports Medicine Staff must be informed of all referrals prior to the appointment. When applicable, student-athletes may request to have a second opinion. The Sports Medicine Staff will coordinate and pay for the second opinion with a designated physician. However student-athletes who choose to seek outside treatment or referrals on their own, without prior approval, may be responsible for the full cost of services.

	ORGIA TECH SPORTS MEDICINE CEPTANCE OF RISK, MEDICAL CLEARANCE, AND SCREENING RELEASE
	ase initial in the space provided acknowledging that you have read and understand the risks, expectations and requirements of dent-athletes who compete in intercollegiate athletics at Georgia Tech.
1.	Acceptance of Risk There are inherent risks associated with participation in intercollegiate athletics that include but are not limited to death, severe neck and spinal injuries, which may cause complete or partial paralysis, brain damage, severe internal injury, severe injury to bones, joints, ligaments, muscles tendons, and other aspects of the musculoskeletal system. Additionally, there are risks associated with concussions, eye trauma or injury, environmental conditions such as heat or cold illness and dermatologic conditions. It is understood that such injuries may result in serious impairment of future abilities to engage in activities of normal daily living.
2.	COVID-19 is extremely contagious and is believed to spread mainly from person-to-person contact. Participation in intercollegiate athletics at Georgia Tech, related events, or activity, could increase the risk of contracting COVID-19. I have read and agree to abide by the policies and protocols for COVID-19 at all times while on campus and participating in intercollegiate athletics at Georgia Tech, related events, or activity. I acknowledge that I have been given any information that I may need to determine the risks associated with my participation.
3.	Athletic Medical Clearance All student-athletes must complete and pass a pre-participation physical examination (PPE) scheduled and administered through the sports medicine staff, Georgia Tech Sports Medicine team physician or his designee. The PPE, which is effective for the duration of the academic year, will be arranged after preliminary academic eligibility has been provided to the athletic administration. At any time the team physician may re-examine the student-athlete and change his or her status should the situationwarrant.
4.	Medical Treatment In accordance with NCAA rules, Georgia Tech Sports Medicine Department may provide a student-athlete's medical expenses resulting from any injury or illness regardless of whether the injury or illness occurs during the academic year or summer period. It is the policy of the Georgia Tech Sports Medicine to provide student-athlete medical expenses for those injuries or illness that are the result of athletic practice or competition. The Georgia Tech Sports Medicine Department will not provide medical expenses for illness or injury resulting outside your collegiate sport.
	Student-athletes must report injuries/illnesses occurring as a result of practice/competition to the athletic trainer. The Georgia Tech Sports Medicine Department or Athletics Department will not be responsible for payment of charges resulting from injuries/illness not reported.
5.	Sickle Cell Trait Screening In accordance with NCAA mandates, ALL student-athletes must be tested for sickle cell trait prior to any athletics participation. I acknowledge that I have read and understand the NCAA Sickle Cell Trait Fact Sheet and will either 1. Provide proof of sickle cell testing performed at birth, or 2. Return results of a recent lab screening (blood test), along with medical forms. I understand that there are NO exceptions to this policy and that failure to provide results may result in delayed athletic medical clearance.
6.	Insurance Neither Georgia Tech Sports Medicine Department nor Georgia Tech Athletics are primary insurance providers. It is the policy of the Georgia Tech Sports Medicine Department that all student-athletes submit primary and secondary insurance information. If an injury occurs, your insurance information will be submitted to the prospective provider. The provider will then file with your personal group insurance. The Georgia Tech Athletics secondary insurance or the Sports Medicine Department will pay the difference and you will incur no cost for an intercollegiate injury. This should not affect your policy premium and in many cases will help you meet your existing deductibles.
7.	Georgia Tech Sports Medicine Policies and Procedures I have read and understand all Georgia Tech Athletic Training and Sports Medicine medical documents and forms. I further understand that the Georgia Tech Sports Medicine Department, specifically the Director of Sports Medicine and/or athletics administrators reserves the right to use discretion regarding student-athlete well-fare decisions on a case by case basis.

Georgia Tech Sports Medicine Student-Athlete Rights, Responsibilities and Standards of Care

As a coeducational department and facility, during therapy or while in the facility, everyone will be expected to behave in an appropriate matter. The following guidelines reflect our assurance that we will provide a standard of care and not compromise.

In order to maintain a professional environment and ensure quality and positive student athlete outcomes, below are the responsibilities, rights, and expectations of student athlete receiving care from members of the Georgia Tech Athletic Medicine Team.

Responsibilities as a Student Athlete/Patient:

- You have the responsibility to report injuries and illnesses your attending athletic trainer.
- You have the responsibility to be actively involved in all aspects of your care, treatment and rehabilitation as directed by the attending athletic trainer and physician.
- You have the responsibility to give truthful and complete information about your current health and health history, to the best of your knowledge. Failure to provide the complete and accurate information may impact care, treatment plan, clearance and/or return to activity.
- You have the responsibility to comply with the treatment plan for your care, which includes home care instructions, taking prescribed medications, and rehabilitation protocols.
- You have the responsibility to accept the consequences if you refuse treatment or do not follow your treatment plan or instructions.
- You have the responsibility to be considerate and respectful of staff and other student athletes, which includes respecting others privacy and not sharing any person's private medical history or information.

Rights as a Student Athlete/Patient:

- You have the right to be treated with dignity and respect. Know that your condition and care will only be shared with those athletic medicine staff members who are involved with your care and treatment. At no time will your care be discussed or shared with student athletes or staff who are not directed involved in your care
- You have the right to be involved in making decisions about your care, including pain control. In addition, you may have your family or caregiver assist with these decisions.
- You have the right to be informed about your medical condition and any treatments the attending athletic trainer and physician prescribe.
- You have the right to withhold consent for any treatments and accept responsibility for the consequences of refusing treatments.
- You have the right to be informed of the persons who may be involved in your care and made aware of the individuals who may be present in the examination room during evaluations.
- You have the right to safety and privacy, including a safe environment of care

Treatment Expectations:

- Student-athletes will be treated in the order they enter the athletic training rooms, unless there is an emergency situation.
- Being in the athletic training room does not excuse any student-athlete from class, study hall, or tutoring.
- All student-athletes must wear appropriate attire, which includes short and T-shirts.
- Any behavior that is determined to be inappropriate will be corrected by one of the staff athletic trainers.
- Towels and shorts are not to be removed from the athletic training rooms.
- The use of inappropriate language will not be allowed in the athletic training rooms.
- Student-athletes may not use computers without permission of a staff athletic trainer.
- All backpacks and personal items are to be placed in the cabinets located next to the front door.
- All student-athletes must shower after practice/workouts before receiving treatment
- Records of treatment attendance are open to all coaches for review.
- All medical equipment will be operated by a member of the sports medicine staff. All equipment and supplies must remain in the athletic training room unless permitted by an athletic trainer.
- GTAA Policy is that student-athletes will not consume any dietary supplement that is not given to him/her by the sports medicine department or the sports nutrition department.

Georgia Tech Sports Medicine Information Regarding Sickle Cell Trait Screening

In accordance with recent NCAA mandates, the policy and procedure at GT is that all incoming student-athletes are tested for the sickle cell trait prior to any athletics participation, including practice, or lifting.

Persons of any race, gender and ancestry may test positive for sickle cell trait. Within the past ten (10) years, eight (8) collegiate athletes have died from acute rhabdomyolysis, a result of carrying the sickle cell trait. Some of these players were unaware that they had the trait.

If you have been previously tested for sickle cell trait, contact your family physician, pediatrician, or Health Department to obtain copies of these results. One test per lifetime is sufficient.

If you have never had a lab screening (blood test) for sickle cell trait, or are unable to obtain prior results, then you should schedule one immediately. Typically, the blood test will take 48-72 hours to be finalized and documented results provided.

Please return previous results OR current results along with the Pre-Participation Physical Examination Medical and Insurance Forms to the Georgia Tech Sports Medicine Department. Otherwise, the student-athlete will not be cleared by the Georgia Tech Team Physician to participate in workouts, practice and any other form of athletic participation. THERE ARE NO EXCEPTIONS TO THIS POLICY.

If a student-athlete tests positive for sickle cell trait, a member of the Sports Medicine Department will discuss the inherent health risks and precautions to help avoid sickle cell trait-related problems during his/her pre-participation physical exam. A positive sickle cell trait result does not jeopardize a student-athletes status or eligibility to compete for GT. Positive results may also mean adjustments in the student-athlete's initial conditioning and practice schedule.

Please contact us immediately if you have any questions regarding this policy.

Carla Gilson, ATC
Director of Sports Medicine
Georgia Tech Athletics Association
404-894-5461 (o)

CELL TRAIT

WHAT IS SICKLE CELL TRAIT?

Sickle cell trait is not a disease. Sickle cell trait is the inheritance of one gene for sickle hemoglobin and one for normal hemoglobin. Sickle cell trait will not turn into the disease. Sickle cell trait is a life-long condition that will not change over time.

- During intense exercise, red blood cells containing the sickle hemoglobin can change shape from round to quarter-moon, or "sickle."
- Sickled red cells may accumulate in the bloodstream during intense exercise, blocking normal blood flow to the tissues and muscles.
- During intense exercise, athletes with sickle cell trait have experienced significant physical distress, collapsed and even died.
- ▶ Heat, dehydration, altitude and asthma can increase the risk for and worsen complications associated with sickle cell trait. even when exercise is not intense.
- Athletes with sickle cell trait should not be excluded from participation as precautions can be put into place.

DO YOU KNOW IF YOU HAVE SICKLE CELL TRAIT?

People at high risk

for having sickle cell trait are those whose ancestors come from Africa, South or Central America, India, Saudi Arabia and Caribbean and Mediterranean countries.

- ➤ Sickle cell trait occurs in about 8 percent of the U.S. African-American population, and between one in 2,000 to one in 10,000 in the Caucasian population.
- ▶ Most U.S. states test at birth, but most athletes with sickle cell trait don't know they have it.
- ▶ The NCAA recommends that athletics departments confirm the sickle cell trait status in all student-athletes.
- Knowledge of sickle cell trait status can be a gateway to education and simple precautions that may prevent collapse among athletes with sickle cell trait, allowing you to thrive in your sport.

HOW CAN I PREVENT A COLLAPSE?

- Know your sickle cell trait status.
- Engage in a slow and gradual preseason conditioning regimen.
- Build up your intensity slowly while training.
- ➤ Set your own pace. Use adequate rest and recovery between repetitions, especially during "gassers" and intense station or "mat" drills.
- Avoid pushing with all-out exertion longer than two to three minutes without a rest interval or a breather.
- ▶ If you experience symptoms such as muscle pain, abnormal weakness, undue fatigue or breathlessness, stop the activity immediately and notify your athletic trainer and/or coach.
- Stay well hydrated at all times, especially in hot and humid conditions.
- Avoid using high-caffeine energy drinks or supplements, or other stimulants, as they may contribute to dehydration.

- Maintain proper asthma management.
- Refrain from extreme exercise during acute illness, if feeling ill, or while experiencing a fever.
- Beware when adjusting to a change in altitude, e.g., a rise in altitude of as little as 2,000 feet. Modify your training and request that supplemental oxygen be available to you.
- Seek prompt medical care when experiencing unusual physical distress.

For more information and resources, visit www.NCAA.org/health-safety

CONCUSSION

A FACT SHEET FOR STUDENT-ATHLETES

WHAT IS A CONCUSSION?

A concussion is a brain injury that:

- Is caused by a blow to the head or body.
- From contact with another player, hitting a hard surface such as the ground, ice or floor, or being hit by a piece of equipment such as a bat, lacrosse stick or field hockey ball.
- Can change the way your brain normally works.
- Can range from mild to severe.
- Presents itself differently for each athlete.
- Can occur during practice or competition in ANY sport.
- Can happen even if you do not lose consciousness.

HOW CAN I PREVENT A CONCUSSION?

Basic steps you can take to protect yourself from concussion:

- Do not initiate contact with your head or helmet. You can still get a concussion if you are wearing a helmet.
- Avoid striking an opponent in the head. Undercutting, flying elbows, stepping on a head, checking an unprotected opponent, and sticks to the head all cause concussions.
- Follow your athletics department's rules for safety and the rules of the sport.
- Practice good sportsmanship at all times.
- Practice and perfect the skills of the sport.

WHAT ARE THE SYMPTOMS OF A CONCUSSION?

You can't see a concussion, but you might notice some of the symptoms right away. Other symptoms can show up hours or days after the injury. Concussion symptoms include:

- Amnesia.
- Confusion.
- Headache.
- Loss of consciousness.
- Balance problems or dizziness.
- Double or fuzzy vision.
- Sensitivity to light or noise.
- Nausea (feeling that you might vomit).
- Feeling sluggish, foggy or groggy.
- Feeling unusually irritable.
- Concentration or memory problems (forgetting game plays, facts, meeting times).
- Slowed reaction time.

Exercise or activities that involve a lot of concentration, such as studying, working on the computer, or playing video games may cause concussion symptoms (such as headache or tiredness) to reappear or get worse.

WHAT SHOULD I DO IF I THINK I HAVE A CONCUSSION?

Don't hide it. Tell your athletic trainer and coach. Never ignore a blow to the head. Also, tell your athletic trainer and coach if one of your teammates might have a concussion. Sports have injury timeouts and player substitutions so that you can get checked out.

Report it. Do not return to participation in a game, practice or other activity with symptoms. The sooner you get checked out, the sooner you may be able to return to play.

Get checked out. Your team physician, athletic trainer, or health care professional can tell you if you have had a concussion and when you are cleared to return to play. A concussion can affect your ability to perform everyday activities, your reaction time, balance, sleep and classroom performance.

Take time to recover. If you have had a concussion, your brain needs time to heal. While your brain is still healing, you are much more likely to have a repeat concussion. In rare cases, repeat concussions can cause permanent brain damage, and even death. Severe brain injury can change your whole life.

IT'S BETTER TO MISS ONE GAME THAN THE WHOLE SEASON. WHEN IN DOUBT, GET CHECKED OUT.

For more information and resources, visit www.NCAA.org/health-safety and www.CDC.gov/Concussion.
